

TAKE ACTION TAROT SPREAD

We're not shy about the fact that we often use tarot for business insights. Drawing cards helps us see things from a new perspective or uncover new ways of looking at our challenges, goals, decisions, and next steps. Below we've outlined a spread. Shuffle your deck until you feel ready to draw seven cards in the pattern shown below. Each card position represents a different aspect of you in your business. There is no right or wrong way to read your spread. Use your intuition or a little Googling will help you understand what each card means.

Tarot is the subconscious talking to you, it's whatever you need at that point in time.
